4-Slot Cradle

Charging/Battery Status LED
Slow Blinking Amber = Charging
Solid Green = Fully Charged
Fast Blinking Amber = Charging error
Solid Red = Un-healthy battery

* It is recommended that this product be charged for 24 hours before the first use to ensure that the internal battery is fully charged.

PHONE SETUP

Charge the Battery

1-Slot Spare Battery Charger

4-Slot Battery Charger

SIM Card Installation (MC9596 Only)

1. Remove battery pack.
2. Remove SIM cover using flathead screwdriver.
3. Slide SIM card holder to the left.
4. Lift card holder.
5. Insert SIM card into SIM holder.

NOTE:
The proper position of the SIM card—the card connector (i.e., gold area) should be facing down with the bevelled edge facing down.

6. Lower the SIM card holder down.
7. Slide SIM card holder to the right to lock into place.
8. Reinstall SIM cover and secure screw.
9. Reinstall battery pack.
**10.** Warm boot the MC9596.

Enter Your PIN

After installing the SIM card activate your mobile service connection. In most cases, SIM cards are preset with a PIN (Personal Identity Number), provided by your service provider.

1. Press the Power button to turn on the MC9596.
2. Tap Start > Phone.
3. Enter the PIN from your service provider.
4. Tap Enter.

COMMUNICATION

3 Install ActiveSync®

Download ActiveSync® 4.5 or higher from http://www.microsoft.com and follow the instructions to install ActiveSync onto the host computer.

4 Communicate with Host
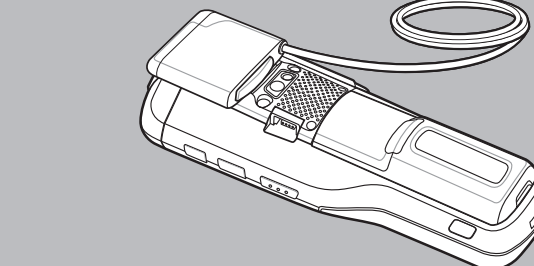

5 Create a Partnership

Follow the on-screen ActiveSync instructions to establish a connection between the MC95XX and the host computer.

ACCESSORIES

microSD Card Installation

1. Remove battery pack.
2. Remove SIM cover using flathead screwdriver.
3. Slide microSD card holder to the left.
4. Lift card holder.
5. Insert microSD card into holder.

NOTE :
The proper position of the microSD card—the card connector (i.e., gold area) should be facing outward with the bevelled corner facing away.

6. Lower the microSD card holder down.
7. Slide card holder to the right to lock into place.
8. Reinstall SIM cover and secure screw.
9. Reinstall battery pack.
10. Warm boot the MC95XX.

Screen Protector

Motorola recommends the use of a screen protector to minimize wear and tear. Screen protectors enhance the usability and durability of touch screen

- Protection from scratches and gouges
- Durable writing and touch surface with tactile feel
 - Abrasion and chemical resistance
  - Glare reduction

Not using a screen protector can affect your warranty coverage.

An initial screen protector is already applied to your MC95XX. Contact your local account manager or Motorola, Inc. for more information and purchasing details. Part number: KT-67525-01R Screen Protector 3/pk.

GPS Information

When using the GPS feature of the MC95XX:

- Acquiring satellite signals may take a few minutes. It is best to be outside and have a clear, unobstructed view of the sky.
- Without a clear view, acquisition takes much longer and could result in the MC95XX being unable to compute the initial position quickly.
- Obtain a satellite fix before moving.
- Shutdown GPS application when not in use.

OPTIMUM SCANNING AND IMAGING
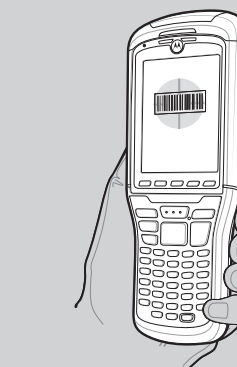

Scanning/Imaging
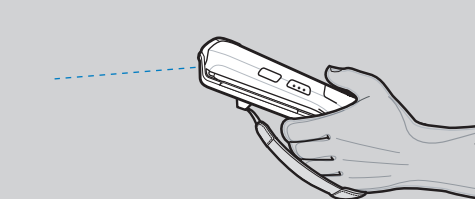

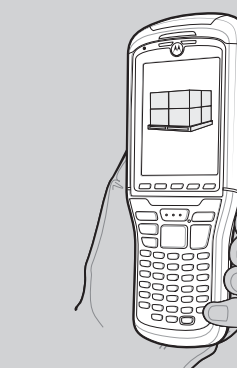

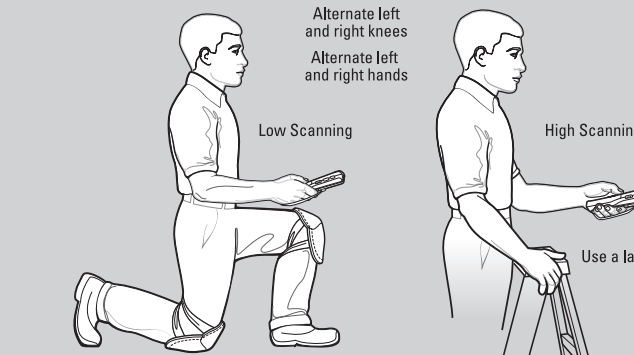

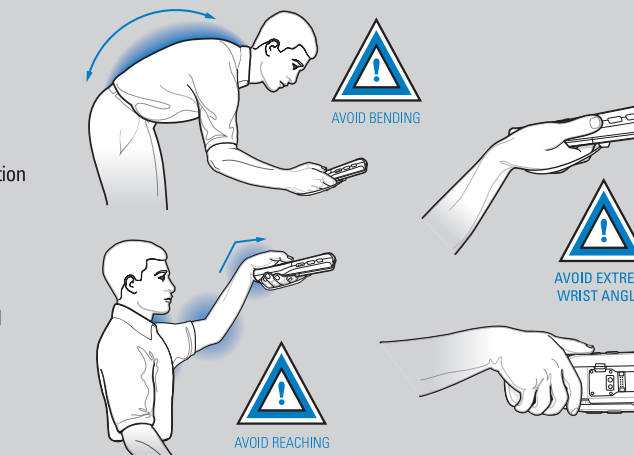

Laser Scanning

Imaging

Camera Decode

1. Launch a bar code reading application on the MC95XX.
2. Position the MC95XX toward the bar code.
3. Press the **Scan** button.
4. In the image window align the red target over the bar code. When the MC95XX decodes the bar code the target turns green.

Camera Photo

1. Tap **Start > Programs > Pictures & Videos > Camera.**
2. Point the MC95XX at an object.
3. Press the **Enter** button.
4. Hold MC95XX still until "Shutter Sound" is heard.
